At the Cutting Edge Reviews

Plasma membrane receptors

Molecular function of the gonadotropin-releasing hormone receptor: insights from site-directed mutagenesis
J.S. Davidson, C.A. Flanagan, I.I. Becker, N. Illing, S.C. Sealfon and R.P. Millar (South Africa, USA) 9

Regulation of gonadotropin receptor gene expression
A.P.N. Themmen, R. Kraaij and J.A. Grootegoed (Netherlands) 15

The functional relationship between FSH and its receptor as studied by synthetic peptide strategies
L.E. Reichert Jr. (USA) 21

Welcome to the family: the anti-müllerian hormone receptor
J.A. Grootegoed, W.M. Baarends and A.P.N. Themmen (Netherlands) 29

Parathyroid hormone and parathyroid hormone-related protein receptor update
R. Muff, W. Born, M. Kaufmann and J.A. Fischer (Switzerland) 35

New frontiers in the molecular mechanisms of growth hormone action
A.C. Herington (Australia) 39

Steroidogenesis

The NCI-H295 cell line: a pluripotent model for human adrenocortical studies
W.E. Rainey, I.M. Bird and J.I. Mason (USA) 45

Follicular oestrogen synthesis: the 'two-cell, two-gonadotrophin' model revisited
S.G. Hillier, P.F. Whitelaw and C.D. Smyth (UK) 51

A working hypothesis for the regulation of steroidogenesis and germ cell development in the gonads by glucocorticoids and 11β-hydroxysteroid dehydrogenase (11βHSD)
A.E. Michael and B.A. Cooke (UK) 55

Intracellular signalling mechanism

G protein pathways: signal processing by effectors
M. DeVivo and R. Iyengar (USA) 65

What are the functions of the pertussis toxin-insensitive G proteins G_{12}, G_{13} and G_z?
S. Offermanns and G. Schultz (Germany) 71

Modulation of cellular responses by hormones: role of cAMP specific, rolipram-sensitive phosphodiesterases
C. Sette, E. Vicini and M. Conti (USA) 75

Paracrine / autocrime mechanisms

Inhibins, activins, their binding proteins and receptors: interactions underlying paracrine activity in the testis
A. Moore, L.A. Krummen and J.P. Mather (USA) 81

Auto/paracrine role of prostaglandins in corpus luteum function
J. Olofsson and P.C.K. Leung (Canada) 87

Regulation of trophoblast interferon gene expression
A.P.F. Flint, F.M.J. Guesdon and H.J. Stewart (UK) 93

Autocrine growth factors produced in the thyroid
M.C. Eggo and M.C. Sheppard (UK) 97

Contents (continued)

Control of transcription

Steroid hormone receptor phosphorylation: is there a physiological role?
G.G.J.M. Kuiper and A.O. Brinkmann (Netherlands) 103

Hormonal regulation of transcription factor activity in mammary epithelial cells
B. Groner, S. Altiok and V. Meier (Germany, Switzerland) 109

Malignant transformation by G protein-coupled hormone receptors
M. Sharif, N. Sasakawa and M.R. Hanley (USA) 115

The key role of CREM in the cAMP signaling pathway in the testis
V. Delmas and P. Sassone-Corsi (France) 121

How do thyroid hormone receptors bind to structurally diverse response elements?
B. Desvergne (Switzerland) 125

The rat prolactin gene: a target for tissue-specific and hormone-dependent transcription factors
D. Gourdji and J.-N. Laverrière (France) 133

The parathyroid hormone-related protein gene and its expression
M.T. Gillespie and T.J. Martin (Australia) 143

Peroxisome proliferator-activated receptors: finding the orphan a home
S. Green and W. Wahli (UK, Switzerland) 149

DNA methylation and gene activity: towards the end of the debate?
D. Christophe and B. Pichon (Belgium) 155

Disease-related mechanisms

Constitutively active receptors as a disease-causing mechanism
J. Parma, L. Duprez, J. Van Sande, R. Paschke, M. Tonacchera, J. Dumont and G. Vassart (Belgium) 159

The biochemistry of endemic cretinism: roles of iodine and selenium deficiency and goitrogens
J.E. Dumont, B. Corvilain and B. Contempre (Belgium) 163

Models of thyroid goiter and tumors in transgenic mice
C. Ledent, M. Parmentier, G. Vassart and J.E. Dumont (Belgium) 167
